Exchange Server 2013 Service Pack 1 Architecture Overview

**Exchange Integration with Unified Messaging, Lync and SharePoint**

- **Unified Messaging** provides phone, email, and voice messaging services to users through a single interface.
- **Lync** for instant messaging, audio and video conferencing, Presence, and collaborative applications.
- **SharePoint** for document management, collaboration, and content creation.

**Simplifies the Protocol Stack**

- **Mailbox Transport Delivery** processes all email messages and determines what rules apply.
- Provides built-in anti-spam and anti-virus protection.
- **Client Access** facilitates easy access to email services.
- **Exchange Web Services (EWS)** provides the functionality to exchange messages, access mailbox information, and manage the Exchange address book.
- **OAuth authentication (service and user impersonation)** for integrated solutions.
- **Unified Contacts Store, with Lync** for unified presence and collaboration.
- Enhanced management experience and integration with other Microsoft applications.
- **Unified Messaging** enables voicemail, email messaging, and audio conferencing.
- **Exchange Web Access** for remote access to email and calendar.
- **SBC | SIP** for voice communication services.
- **Recovery** services for data recovery.
- **Purges** features for managing email and information.
- **Public Folder** for shared resources.
- **Management Role Assignment Policies** for role-based access control.
- **Unified Search** for searching across multiple sources.
- **Unified Mailboxes** for unified management.
- **Unified Contacts** for contact management.
- **Unified Distribution Lists** for list management.
- **Unified Discovery** for finding information.
- **Unified Identity** for user and group management.
- **Unified Messaging** for integrated communication services.
- **Unified Search** for unified search capabilities.
- **Unified Contacts** for contact management.
- **Unified Distribution Lists** for list management.
- **Unified Discovery** for finding information.
- **Unified Identity** for user and group management.
- **Unified Messaging** for integrated communication services.
- **Unified Search** for unified search capabilities.
- **Unified Contacts** for contact management.
- **Unified Distribution Lists** for list management.
- **Unified Discovery** for finding information.
- **Unified Identity** for user and group management.
- **Unified Messaging** for integrated communication services.
- **Unified Search** for unified search capabilities.
- **Unified Contacts** for contact management.
- **Unified Distribution Lists** for list management.
- **Unified Discovery** for finding information.
- **Unified Identity** for user and group management.
- **Unified Messaging** for integrated communication services.
- **Unified Search** for unified search capabilities.
- **Unified Contacts** for contact management.
- **Unified Distribution Lists** for list management.
- **Unified Discovery** for finding information.
- **Unified Identity** for user and group management.
- **Unified Messaging** for integrated communication services.
- **Unified Search** for unified search capabilities.
- **Unified Contacts** for contact management.
- **Unified Distribution Lists** for list management.
- **Unified Discovery** for finding information.
- **Unified Identity** for user and group management.
- **Unified Messaging** for integrated communication services.
- **Unified Search** for unified search capabilities.
- **Unified Contacts** for contact management.
- **Unified Distribution Lists** for list management.
- **Unified Discovery** for finding information.
- **Unified Identity** for user and group management.
- **Unified Messaging** for integrated communication services.
- **Unified Search** for unified search capabilities.
- **Unified Contacts** for contact management.
- **Unified Distribution Lists** for list management.
- **Unified Discovery** for finding information.
- **Unified Identity** for user and group management.
- **Unified Messaging** for integrated communication services.
- **Unified Search** for unified search capabilities.
- **Unified Contacts** for contact management.
- **Unified Distribution Lists** for list management.
- **Unified Discovery** for finding information.
- **Unified Identity** for user and group management.
- **Unified Messaging** for integrated communication services.
- **Unified Search** for unified search capabilities.
- **Unified Contacts** for contact management.
- **Unified Distribution Lists** for list management.
- **Unified Discovery** for finding information.
- **Unified Identity** for user and group management.
- **Unified Messaging** for integrated communication services.
- **Unified Search** for unified search capabilities.
- **Unified Contacts** for contact management.
- **Unified Distribution Lists** for list management.
- **Unified Discovery** for finding information.
- **Unified Identity** for user and group management.
- **Unified Messaging** for integrated communication services.
- **Unified Search** for unified search capabilities.
- **Unified Contacts** for contact management.
- **Unified Distribution Lists** for list management.
- **Unified Discovery** for finding information.
- **Unified Identity** for user and group management.
- **Unified Messaging** for integrated communication services.
- **Unified Search** for unified search capabilities.
- **Unified Contacts** for contact management.
- **Unified Distribution Lists** for list management.
- **Unified Discovery** for finding information.
- **Unified Identity** for user and group management.
- **Unified Messaging** for integrated communication services.
- **Unified Search** for unified search capabilities.
- **Unified Contacts** for contact management.
- **Unified Distribution Lists** for list management.
- **Unified Discovery** for finding information.
- **Unified Identity** for user and group management.
- **Unified Messaging** for integrated communication services.
- **Unified Search** for unified search capabilities.
- **Unified Contacts** for contact management.
- **Unified Distribution Lists** for list management.
- **Unified Discovery** for finding information.
- **Unified Identity** for user and group management.
- **Unified Messaging** for integrated communication services.
- **Unified Search** for unified search capabilities.
- **Unified Contacts** for contact management.
- **Unified Distribution Lists** for list management.
- **Unified Discovery** for finding information.
- **Unified Identity** for user and group management.
- **Unified Messaging** for integrated communication services.
- **Unified Search** for unified search capabilities.
- **Unified Contacts** for contact management.
- **Unified Distribution Lists** for list management.
- **Unified Discovery** for finding information.
- **Unified Identity** for user and group management.
- **Unified Messaging** for integrated communication services.
- **Unified Search** for unified search capabilities.
- **Unified Contacts** for contact management.
- **Unified Distribution Lists** for list management.
- **Unified Discovery** for finding information.
- **Unified Identity** for user and group management.
- **Unified Messaging** for integrated communication services.
- **Unified Search** for unified search capabilities.
- **Unified Contacts** for contact management.
- **Unified Distribution Lists** for list management.
- **Unified Discovery** for finding information.
- **Unified Identity** for user and group management.
- **Unified Messaging** for integrated communication services.
- **Unified Search** for unified search capabilities.
